

## **Medical Billing Software: Netalytics Chooses MPMsoft as Its Medical Billing Software Solutions Partner**

*Netalytics, a maker of automated clinic systems for addiction treatment facilities has recently chosen MPMsoft as its back-office medical billing software technology.*

San Francisco, CA, August 26, 2008 --(PR.com)-- MPMsoft [medical billing software](#) is the engine that powers a growing number of electronic medical record software ([EMR](#)).

Netalytic's flagship product, Methasoft, is an advanced Clinic Automation System designed for addiction treatment facilities. Based on years of in-use experience throughout a variety of clinical settings, Methasoft offers a significant increase in clinic efficiency, including modules for financial management, pharmacy management, and patient management.

"More and more our client's want an single solution that meets all their needs, end to end, including electronic billing to medical insurance. [MPM](#) provides the final leg of that task taking our patient billing data and converting it into the electronic claim format required to get paid by Medicare and Medicaid" says Mark Essex, President of Netalytics.

"We believe that our partnership with MPMsoft gives us a cutting edge product that meets our client's needs in ways superior to our competitors". "Partnering with MPM has reduced our time to market by as much as two years, and they additionally supply the ongoing day to day 'billing' support related to our client's electronic billing needs. This efficiency allows us to focus all our energy on meeting our client's practice management needs: we're happy about the choice and expect to have a fully integrated product released as early as fourth quarter, 2008".
