

Pure Life Releases New and Improved Gabatrol with Recently Discovered Potent Herb

Gabatrol's increased potency using a newly discovered herb not found in any other product can provide stress and anxiety relief quickly. Now people plagued with stress and anxiety can be calm and focused allowing them to work at their peak performance.

Norwalk, CT, September 05, 2008 --(PR.com)-- Pure Life has released a new and improved version of Gabatrol. Gabatrol is an all natural formula that is safe and works fast to reduce your stress, tension and anxiety while also enhancing mental clarity and focus. Most users report feeling its effects in as little as 20-30 minutes.

The new and improved Gabatrol has an all new herb called sceletium tortuosum that is not found in any other product. This powerful combination in Gabatrol's unique blend is what gives users both less stress & calm with enhanced mental clarity & focus.

Gabatrol quickly optimizes brain function in several ways. One such way is via Gaba - a naturally occurring amino acid found in food, but which is also a potent neurotransmitter in the brain. By enhancing Gaba levels in the brain, Gabatrol promotes relaxation and relief from stress and anxiety. Gabatrol also works to stabilize electrical impulses between brain cells (called neurons) which also enhances mental clarity and reduces stress and anxiety.

Gabatrol also helps optimal brain chemistry by increasing the other 'feel good' neurotransmitters like Serotonin and Dopamine. This helps people relax and can help lower stress hormones like adrenaline and cortisol. Elevated levels of these stress hormones can be very dangerous and can lead to many health problems. This is why stress is one of the most dangerous health risks people face. It is imperative for optimum performance and for health that you control excess stress.

People are looking for an edge to stay ahead of the pack. The key is to control stress and tension while having razor sharp focus and clarity. Gabatrol is the only safe, all natural product that can help anyone reach their goals with less stress and tension and more calm and focus.
