

Communications Technology Int'l Inc. Releases "Mini" and "Mini+" Wireless Voting Devices for Audience Participation

Cresskill, NJ, September 25, 2008 --(PR.com)-- Communications Technology International Incorporated (ComTec) has today announced general availability of [Fleetwood Reply Mini and Mini+ keypads](#).

Housed in miniature packaging, yet not lacking in functionality, Reply Mini's possess the strength and reliability of regularly sized Fleetwood Reply keypads. Respectively designed for each operational platform, Reply Mini keypads integrate seamlessly into existing Reply hardware configurations, allowing for natural expansion of usability and inventory.

Mini's compact design, wear ability and lightweight build makes for easy transport and widespread usage. Plus, newly designed foam insert packaging and soft-side carry cases make for excellent portability.

Reply Mini for Worldwide

A petite version of the widely used Reply Worldwide keypad, Mini for Worldwide is a 5-button, sub-credit card size keypad that operates with the Reply Worldwide Base Station, Model CRS940, and the newly released CRS941, a compact USB stick base station for Worldwide, listed below.

The Reply Worldwide single-digit entry platform has become heavily depended upon for its basic and reliable performance. The new "mini" version of the already well-liked Reply Worldwide keypad can cover much of the average field of use, offering input numbers 1-5.

Cost-effective for end-users and industry vendors alike, Reply Mini is a favorable option when bearing in mind usage expectations and budget control. And, not only is Reply Mini for Worldwide the most affordable Reply keypad available, it integrates seamlessly into existing Reply Worldwide systems.

Also newly available in the Worldwide platform is the Reply Base Station Model CRS941, a fully operational Worldwide Base Station, designed as a USB Stick. This Base Station can be used in place of, or alongside, the already well established CRS940 Reply Worldwide Base Station.

Reply Mini for Plus

Reply Mini Plus is welcomed to the industry as the latest product in the Fleetwood Reply Hardware family. A miniature version of the multi-digit entry Reply Plus keypad, Mini Plus brings to the table many of the technical strengths of big brother Reply Plus, packaged compactly as a 10-button, sub-credit card size, lightweight and wearable (with lanyard) device.

Reply Plus' dynamic connectivity attribute, which allows users to maintain the same keypad while moving to different locations, makes this new product an ideal audience response solution. Additionally, transmission of both the keypad ID and individual device serial number, along with vote data, ensures individualized accuracy and data tracking.

Serving a multitude of user needs from the same platform, Reply Plus technology is proving to be a new

industry favorite. And now, this robust multi-digit technology is available in a miniature form.

Reply Mini Plus operates with the standard Plus base station Model WRS970, as well as, the newly available Model WRS971, a fully operational base designed as a USB Stick that can be used in place of, or alongside, the standard Plus Base Station.
