

See the New 2009 E320 Bluetec at Mercedes-Benz of Long Beach

A Clean Diesel with All the Power.

Long Beach, CA, September 27, 2008 --(PR.com)-- Mercedes-Benz of Long Beach is inviting all Southern California residents to come in and check out the new 2009 E320 BlueTEC Sedan.

“The 2009 E320 blends fuel efficiency and low noise, without sacrificing the power,” said General Manager Ray Burke. “It has uncompromising performance, safety and luxury.”

Starting at an MSRP of \$53,775, the E320's V-6, 3.0-liter, 24-valve engine delivers a full 210-horsepower with 32 miles per gallon highway. This combined with its 7-speed automatic transmission, touch shift technology and acceleration rate of 0 to 60 in 6.6 seconds makes the E320 a pleasure to drive.

The breakthrough BlueTEC technology in the E320 reduces soot and harmful emissions but still delivers an amazing amount of horsepower. Through the use of Selective Catalytic Reduction and DeNOx, catalytic converters successfully reduce the amount of nitrogen oxides. The result is simply the cleanest production diesel engine available.

The E320 is also equipped with the all-new COMAND System, which allows for hands-free calling and optional navigation functions. With this option you can choose music tracks, change stations, adjust the volume as well as make calls and get directions to your final destination. Beyond traditional music sources, there is also the choice for SIRIUS Satellite Radio and an SD memory card slot to take your driving experience to the next level.

Mercedes-Benz of Long Beach, located at 2300 E. Spring Street in Signal Hill, Calif., strives to offer the highest levels of service in all departments with competitive pricing. With a knowledgeable sales staff, factory-trained service and parts experts and a wide selection of new and Certified Pre-Owned vehicles, Mercedes-Benz of Long Beach is committed to providing Southern California residents with a true Mercedes experience.
