

Enjoy Independent Living and Peace of Mind with A-1 Alarm Protection's Guardian Alert 911 Phone

Today, A-1 Alarm Protection redefined the face of the personal emergency response systems (PERS) industry by introducing a new exciting product – the Guardian Alert 911. Protect the ones you love with this innovative system that instantly connects to an emergency operator with just One push of a button.

Brownstown, MI, October 07, 2008 --(PR.com)-- The Guardian Alert's uniqueness is that it allows its user to speak directly through the mini wearable pendant and have a two-way conversation with an emergency operator and there are No Monthly Fees.

Bob Shonce of A-1 Alarm Protection stated, “We are very excited to introduce the Guardian Alert 911 phone into this growing market. This new product brings the latest in technology to the care of our aging parent population who would still love to live independent lives at home. Just knowing that an emergency operator is a push button away can give your loved ones tremendous peace of mind.”

The easy to install system comes as a set - a base station which plugs into an existing phone jack in the central part of the house and a mini lightweight speakerphone pendant which is worn by the user. However, unlike its competitors, the Guardian Alert 911 is the only product that offers complete coverage anywhere in or around the home, not just within 50 feet of a speakerphone or base station. It offers protections up to 600 feet when outdoors, shoveling snow, in the basement or working in the yard where accidents frequently occur.

You are never home alone with the Guardian Alert 911; it is easy to use, it voice prompts through dialing, shutdown, system test and battery test. It is very durable and even splash-resistant, so that it can be worn in the shower. This life saving device never requires charging and operates on a single AAA alkaline battery that is replaceable after 1 year in standby or for up to 30 minutes of talk time. It even shuts down automatically if ever left on.

Bob added, “Personal security and safety is not something an individual should have to pay a monthly fee indefinitely. The Guardian Alert 911 is a one-time cost that will protect a person for years to come without any monthly fees.”

Guardian Alert 911 also offers an optional accessory, the battery backup unit. This product provides up to 24 hours of standby power to the Guardian Alert 911 base station during a power outage. It simply plugs in between the wall and the base unit.

The world's only two-way emergency pendant communicator, the Guardian Alert 911 is the most effective, safe, and efficient Personal Emergency Response System (PERS) for 24 hour - 7 days a week emergency protection. Countless accidents and deaths occur every year that could have been prevented if 911 was able to be reached more quickly. You can put a stop to these preventable accidents with the “Guardian Alert 911.”

This product is now available by calling A-1 Alarm Protection at 866-535-0898. Regular price is \$199.95. For a limited time, you can order the Guardian Alert 911 for only \$159.95 including shipping plus tax. Please use Promo Code PR100708 to save your \$40.00.

A-1 Alarm Protection is a Michigan owned, Michigan licensed alarm company that specializes in affordable, quality, home and small business security, CCTV & PERS systems from companies such as GE, Honeywell, Speco, LogicMark and ARM Electronics.

Facts on Emergencies:

Research supports the common sense notion that getting prompt help makes surviving an emergency more likely. The ability to get help also boosts the odds that a senior will continue to live independently. The longer a person spends helpless, the greater the likelihood he/she will be discharged into supportive care. For elderly people who live alone, becoming incapacitated and unable to get help is a common event, which usually marks the end to their ability to live independently. (New England Journal of Medicine)

Facts on Falling

50% of people who fall require assistance from someone else to get up. After a fall or other emergency, 90% of people who get help within one hour will continue independent living, but after 12 hours without help only 10% of people will continue to live at home. (New England Journal of Medicine)
