

New Type of Executive Luxury Car is Now Available

The new type of Executive Car is now available: Users can now have their private office inside their car, with desks installed, use the internet, work on their laptop, enjoy drinks from the bar, watch TV and DVD, communicate in pure comfort as if in their office.

San Francisco, CA, April 22, 2009 --(PR.com)-- LimousinesWorld has added a New concept to its line of New Luxury Cars and new Limousines models: [The Executive Mobile Office SUV](#).

It is an Executive Luxury Car with all the Office equipment installed inside (Internet, Desks, Computer connections, Captain chairs, bar, TV, DVD, etc...) that a businessperson needs in order to work comfortably and efficiently.

It is like a Luxury Private High Tech Office on Wheels.

What are the benefits for the Business person? Many: Time and Money saved while traveling and working inside the vehicle, comfortable time spent while working, vehicle is internet wifi compatible, desks are installed for a better work experience, seats can lay down for resting, little bar for drinks, privacy divider from the chauffeur, TV and DVD installed, etc...to name a few.

This new concept of Executive Car is gaining grounds worldwide among business people, VIP and politicians who want to work efficiently and comfortably in their car, as well as with individual buyers who want to travel with their families comfortably.

This luxury car can be custom built on a Cadillac Escalade, Mercedes GL, Lincoln Navigator, Infiniti QX56 and Ford Expedition.

You can visit the company's website and contact LimousinesWorld to learn more about the features and equipment of the Mobile Office and see pictures of the various models of Executive Cars:
