

Well-Known Chicago Medical Spa Offers Latest Anti-Aging Procedure with Proven Results

Chicago, IL, June 25, 2009 --(PR.com)-- New to the anti-aging industry and medical clinics in the U.S., is Dysport ®, an injectable that improves and smooth away fine lines and wrinkles. Dysport ® will be added to the NuU menu of services late-August 2009.

Dysport ® also known as Reloxin, has been widely used in Europe for over 17 years and has a proven track record of safety and success in the United Kingdom and New Zealand. Recently, the U.S. Food and Drug Administration sanctioned Dysport ® for both cosmetic and therapeutic use.

Much like Botox, Dysport temporarily weakens the facial muscles which then leave the face looking fresher and smoother. Over the years, skin loses elasticity and a lifetime of laughs and frowns become etched on our faces leaving permanent creases in three common areas; crow's feet, glabella (“elevens”) and the frontalis (forehead lines).

Results can be seen as soon as two days, or even as late as 2 weeks; depending upon the individual. In addition, Dysport may be metabolized differently and the continuous treatments will vary.

NuU Medspa is the pioneer of medical spas and specializes in all treatments that fix, repair and rejuvenate the face and body. For fine lines and deep wrinkles, Botox and Dysport temporarily soften the lines and creases in the face and around the eyes. To add years back to your face, choose fillers such as Restylane and Juvederm for lip augmentation and nasolabial folds. Other specialty treatments that remove hyperpigmentation, rosacea and broken capillaries include photofacial, laser skin resurfacing and microdermabrasions and chemical peels. Men and women of all ages have benefit from laser hair removal on any body part.

New to NuU Medspa is SmartLipo, FDA-approved laser-assisted liposuction that has proven to remove inches of fat and tighten skin simultaneously, targeted to virtually any body part that has accumulated fat. SmartLipo in conjunction with NuU staff naturopathic doctor's wellness program can drastically improve your well-being from the inside out. Dr. Shah practices only homeopathic methods to help treat the symptoms not mask. Through hormone replacement therapy, food allergy testing, blood work and medical grade supplements; Dr. Shah has helped many struggling clients get a grip on their weight and healthy lifestyle.

NuU Medspa locations can be found in Chicago land; Lincoln Park, Schaumburg, Wilmette, Oak Brook and Arizona locations; Scottsdale, Phoenix and Glendale. NuU welcomes complimentary consultations and walk-ins Monday - Saturday in Illinois and Monday - Sunday in Arizona.
