

WildGate Joins DIDX to Sell 500,000 United States DID Numbers

Wildgate, Inc. a California based telecommunications service provider joins DID Exchange (DIDx.org) to sell half a million DID telephone numbers over the Internet to over 3,000 other telecom companies, USA and international.

Pensacola, FL, September 14, 2006 --(PR.com)-- Wildgate, Inc. a California based telecommunications service provider, joins DID Exchange (DIDx.org) to sell half a million DID telephone numbers over the Internet to over 3,000 other telecom companies, USA and international.

DIDX is the world's largest telecom DID phone number wholesale market that handles DID phone number routing, billing and Enumering over VOIP (Voice Over Internet Protocol).

DIDX service empowers the telecom company to expand from a local phone company to a global phone company.

By joining DIDX, Wildgate, Inc. will have instant access to over 3000 global telecom web sites who are selling VOIP phone services. Wildgate phone numbers are now available to wholesale customers around the globe, without having to provide further technical assistance.

DIDX provides telecom companies like Wildgate, Inc. one universal interop and interconnect with over 3000+ other telecom companies on the DIDXchange. Each is able to buy DID, sell DID or both. (DID is direct inward dialing or incoming phone number.)

Companies on the DIDXchange include SIPphone, Acropolis Telecom, Yahoo-Inc, Vonage and Voice Pulse.

About DIDX.org:

DIDX empowers smart start up VoIP Companies to become global telecom operators. The DIDXchange offers USA and international phone numbers to the DIDX telecom membership. With 3000 + registered service provider members, the DIDX listing totals over 2 million numbers, from Australia, Japan, Malaysia, United Kingdom, USA, Canada and 40 other countries.

DIDX creates additional revenue streams for telecom carriers who take advantage of this number exchange service, whether buying or selling DID's or both.

About Super Technologies Inc:

Super Technologies Inc was incorporated in 1999 in Delaware, USA. It began with the virtualphoneline.com concept of offering an IP-based phone number on a hardware device. The company was the first, and then later winning the Best of Show award at Spring Internet World, before the Vonage revolution began.
