

Sportexe Rolls Out the Green Carpet for the Saints Return to the Superdome

Sportexe installs Momentum synthetic turf in the Superdome for the return of the New Orleans Saints on Monday night.

Round Rock, TX, September 22, 2006 --(PR.com)-- The city of New Orleans is once again buzzing with excitement as Super Bowl-like festivities celebrate the reopening of the Superdome and the return of the New Orleans Saints. Sportexe is proud to be a part of the celebration that will kick off the reopening of the Superdome this Monday night as the undefeated Saints take on the Atlanta Falcons.

“We are proud to be part of this momentous occasion” said Mark Nicholls, CEO of Sportexe “The reopening of the Superdome is a sign of New Orleans resiliency and a testimony to the spirit of the people of New Orleans”

The game will be televised live on ESPN at 7:30 C.S.T and marks one of the best starts for the Saints football team. This is the third straight year that the Superdome has installed the Sportexe Momentum® 41 synthetic turf system. This synthetic turf installation is the largest install to date for Sportexe. With less than 20 days to place the 121,412 square feet of synthetic turf, the Sportexe crew was able to complete the installation a day ahead of schedule. This will be the first time the team has stepped onto the turf at the Superdome in over a year. The Momentum® turf system features a sand and rubber infill system; the blades consist of the exclusive Strenexe™ fiber providing a consistent and durable playing surface.

Sportexe® incorporates the very best into every square foot of Momentum®, the industry-leading, high-performance synthetic turf system. Momentum is dense, firm, and fast - a superior surface designed to maximize performance and player safety. Momentum is made with the exclusive Strenexe™ fiber, which is much stronger and more durable than previous generations of slit-film fibers. Momentum is available in three different configurations, so there is a system that is perfect for your needs.
