

Wrinkle System Introduces the Two Minute Wrinkle Drill

Wrinkle System, a respected wrinkle cream brand that makes a popular anti aging wrinkle cream, has recently launched a TRUE system of products. The Two Minute Wrinkle Drill is not only affordable, but highly effective.

Miami Beach, FL, November 30, 2009 --([PR.com](#))-- Wrinkle System made a splash last year when it launched amidst economic turmoil. The company gave away thousands of it's anti wrinkle creams bearing the company name and logo. The promotion went over so well that many of the lucky customers are still using the wrinkle cream long after the free promotion.

Delivering on it's promise to deliver a complete system of anti wrinkle products at an affordable price, the company recently launched the [Two Minute Wrinkle Drill](#).

This system of products starts off with a facial cleanser, called the Extreme Cleansing Gel, which should be the core product of any anti aging system, according to company officials. After cleansing the face, the [Dark Circle Serum](#) is applied. This clinically tested formula works wonders at getting rid of dark under eye circles as well as puffiness. Finally, the anti wrinkle cream that has delivered powerful results all year is the final component of this truly innovative anti aging system.

"We set out to make Wrinkle System's brand not only effective, but affordable," said company spokesmen Sherry Davis. "We know our customers love to take care of their skin but also have to watch their wallets, which is why this system of products is priced under \$100."

With many brands of skin care products reaching expensive price points, Wrinkle System delivers clinically tested products with premium ingredients without the premium price point. The company has always aimed at being appealing to the masses, not just the uber-rich who spend thousand of dollars on skin care products in one single swipe.

Also, the company is proud to announce the launch of three other products in the Wrinkle System brand. The highly-anticipated [Wrinkle System Therapeutic Sunblock](#) is an anti aging marvel. Containing anti wrinkle ingredients such as Argireline, this sunblock is perfect for anyone age 30 or over who wants to actively prevent and treat wrinkles.

Also available for sale is the Cellular Moisturizing Gel, which is designed for daily use to promote new cell growth. Infused with seaweed extract, this formula is very popular in luxury spa treatments.

For people looking for an instant fix to help tighten and lift facial skin, the instant face lift is the perfect anti aging product. The head formulator of this product refers to this as "plastic surgery in a bottle," mainly because of the instant effect one can notice upon application, which lasts for 6-8 hours. This is the perfect product for reunions, weddings, or times when a solid first impression is an absolute must.

Wrinkle System is located in South Florida's Skin Belt, and is proud to use extensive local testing before

launching any product.
