Empire Medical Training is an American based training institution that has remained the #1 training and certification source worldwide with Surgical Workshops, Aesthetic Workshops, Pain Management Procedures, Liposuction, Mesotherapy, Cellulite, and Lipo Therapies with the continuing goal to help students and physicians succeed in Aesthetic Medicine. Mesotherapy (Lipo Dissolve) continues to be sought after by patients because of its relative simplicity in burning fat and cellulite, as well as the safety profile compared with liposuction.

Learn the Traditional Mesotherapy procedures along with the newest technologies being utilized for fat and cellulite reduction such as the non invasive delivery systems (RF Thermal, Needleless Meso) that are now available. Each student will receive the specific formulas, forms, consents, and prescriptions with the ingredients for each mixture formulated and compounded. Physicians are excited about the financial impact this service will create within an existing practice.

Upon the completion of Empires hands-on training workshop physicians are confident and prepared to perform all the techniques precisely and without complication. This program is delivered by Physician Specialists that are experts in Mesotherapy protocols and techniques. Techniques are performed on live patients during the Hands-On sessions using needle and injection Meso guns. Mesotherapy injections are fairly painless with outstanding results that are comparable to liposuction without surgery in small body fat areas as well as the chin and eyes.

The technique is a simple ten minute procedure with no down time and safer than Liposuction which does not reduce cellulite. Mesotherapy has gained significant popularity because of these reasons as well as the results obtained in conjunction with other aesthetic treatments or services. With Dr. Stephen Cosentino D.O. and the South Florida Mesotherapy Institute receive detailed instruction in Mesotherapy Techniques including Cellulite removal, Spot Fat Reduction, Body Contouring, Weight Loss Procedures, Face and Neck Rejuvenation and the “Meso-Lift” The “Non Surgical Face Lift.”

Empire Medical Training offers training programs with options such as Comprehensive Botox Cosmetic, Dermal Filler, Pain Management Procedures, Liposuction, Mesotherapy, Cellulite, Autologous Fat Filler Procedures and Lipo Therapies. With over 200 CME Medical and Aesthetic workshops offered each year, Empire has trained over 29,000 Physicians, Dentists, Nurses, and other Health Care Professionals. With thousands of testimonials from satisfied attendees, Empire stands behind the programs and provide a complete satisfaction guarantee.

The most recent news at Empire Medical Training is the introduction of the newest program available to physicians. Empire Medical Training has added the convenience to training programs with the newest concept in aesthetic procedure training. The Private Aesthetic Training is provided to the physician in the physicians own practice setting. Empire travels to the physician and provides training in the physician's office. The physician has the benefit of earning revenue while in training.

Empire offers over 27 different programs throughout the US in Aesthetic, Medical, and Surgical procedures.
