

Portable Restroom Company United Site Services Expands in Texas

Westborough, MA, October 20, 2006 --(PR.com)-- United Site Services today announced their acquisition of two portable restroom companies in Texas. Becoming part of the USS family are Capital Chem Can in Austin and San Antonio, and Pitstop Portable Restrooms in San Antonio. These companies join the well established USS operation in Dallas to broaden the company's site services coverage in the Lone Star State.

Terry Bellora, CEO of United Site Services, said "Both Capital Chem Can and Pitstop Portable Restrooms are quality companies that meet the high service standards associated with the United Site Services brand. They enable us to serve the needs of our Texas customers consistently over a wide area. We are tremendously excited to welcome the employees of both organizations to USS. I want to congratulate the previous owners of these two companies. They did excellent jobs focusing on quality throughout their organizations."

With these companies as a platform, USS believes it can rapidly grow its presence in San Antonio, Austin and the South Texas markets. Superior service, a strong brand and a professional sales organization will enable the company to expand business with long term customers while adding new relationships in the portable toilet rental and other site services rental market.

United Site Services continues to look for quality portable restroom companies to acquire in select markets. Companies that are strong acquisition candidates have a reputation for quality service, high customer satisfaction and maintaining their equipment in excellent condition. As it grows, USS is also looking for exceptional talent to add to its management team.

United Site Services is the premier provider of portable restrooms, temporary fence, temporary power, and temporary storage in the United States. The company has more than 40 operating locations coast to coast and the largest inventory of portable restrooms, restroom trailers, and other portable sanitation equipment in the industry.
