

Trustfield.com to Support Web Sites Built With Ruby on Rails™

Trustfield.com, a leading Internet web hosting solutions provider for businesses and individuals, now supports Web sites created using Ruby on Rails.

Orlando, FL, October 23, 2006 --(PR.com)-- Ruby on Rails is an open-source framework which lets developers easily assemble rich and dynamic Web sites. Programming with Rails allows a Web designer to wrap applications easily around a database. It has been widely acclaimed in Web development and software engineering circles as a new standard for ease of development and speed of delivery.

"We are pleased to announce this meaningful development to our registered users." says Gabe LeBlanc, founder of Trustfield.com.
