

Austin Graphics Adds High Definition Printing

Austin Graphics today announced it has installed the New EFI™-Vutek® QS2000 UV curing digital inkjet printer. The first 2 meter (80 inch) High Definition Superwide Format Printer in Austin.

Austin, TX, February 07, 2007 --(PR.com)-- Austin Graphics has installed the Vutek® QS2000 Superwide flatbed printer that produces superior image quality on both rigid and flexible substrates up to 80 inches (2 meters) wide and up to two inches (5.08 cm) thick. This printer features the ability to produce output up to 750 square feet (70 square meters) per hour -- or up to 16 - 4' x 8' boards per hour -- allowing us to meet demanding turn-around times while producing greater quantities of high quality product than ever before.

Key features of this addition include: High Definition printing (HDP) resolutions up to 1080 dpi, brilliant six color imaging and a special seventh white ink channel for new and creative applications.

Austin Graphics also announces it has installed the Zund L-3000 Digital Die Cutting system. This system is used for digitally cutting vinyl sheet / roll, decals, paper, hard foam boards, MDO, acrylic panels, aluminum and more.

Austin Graphics, (www.austingraphics.com) A Professional Graphics Company, is a leader in the Austin market for custom large format and superwide format digital graphics. Austin Graphics is an Authorized 3M™ Scotchprint® Graphics Manufacturer, offering custom auto wraps and installation to a wide range of clients including Capital Metro and the Discovery Channel Pro Cycling Team. Austin Graphics, the 2006 Vendor of the Year by the Austin Advertising Federation.
