

Advanced Film Solutions-Tampa Home Tinting Ramps Up to Accommodate Enhanced TECO Rebate Program

Tampa, FL, May 16, 2011 --(PR.com)-- TECO has recently improved their window tinting rebate program to encourage reduced demand, improved home comfort and energy efficiency.

Advanced Film Solutions is Tampa's leading installation company for NFRC rated solar and solar security window films. Advanced Film Solutions announced their investment in trained installers to keep up with the increased demand.

Mike Feldman, President of Advanced Film Solutions and the former National Sales Manager of 3M Window Film advised, "We have already experienced an increased number of installations in Hillsborough and Polk Counties. The fact that TECO will reward a window film installation with a \$2.00 a square foot rebate and no cap is noteworthy."

Feldman suggests that the new TECO window tinting reward program is easily the Nation's highest per square foot rebate for a window tinting investment.

"Our Vista, Huper Optik and LLumar Films can reduce monthly cooling costs by 50% an already significant and persuasive reason to choose window tinting. Now with this enhanced TECO rebate a homeowner's pay-back is less than one year!"

There are several easily attained requirements and the rebate process has been streamlined. For details refer to
