

topseos.com Ranks Top 10 Web Design Companies for June 2011

The Top 10 Web Design Companies for June 2011 has been ranked by topseos.com, the independent authority on search vendors.

Plymouth, IN, June 02, 2011 --([PR.com](http://www.pr.com))-- topseos.com, an independent authority on search vendors has named the Top 10 [Web Design](#) for the month of June 2011. All the virtual spokesperson firms recognized next to hundreds of other web spokesperson services have gone through an evaluation system facilitated by a qualified and experienced team of researchers.

“A good [Web Development](#) needs to keep this in mind and should be able to balance the art of functionality and appearance without getting carried away by either. The design of the website should, first and foremost, convince people to do what you have brought them there for,” said Jeev Trika, Managing Partner of topseos.com (<http://www.topseos.com>).

The Top 10 [Web Design Companies](#) for June 2011 are:

- 1.) WebiMax
- 2.) Web312
- 3.) Klikzy Creative
- 4.) DeepBlue
- 5.) Customer Magnetism
- 6.) Hudson Horizons
- 7.) Wpromote, Inc.
- 8.) OneIMS
- 9.) 61designstreet.com
- 10.) HypeLife Brands

Though it is perhaps one of the most evident features of a website, the design is not always given as much thought it deserves. The design of a website is intricately intertwined with not only its appearance but also its effectiveness. Web design has a lot to do with making the website efficient and convenient to use without losing the visual appeal of it.

topseos.com assesses the top [Web Design Services](#) through a rigorous evaluation system. A series of processes and questions allow them to identify those firms who truly excel in their performance. As part of their assessment, they asked at least three clients of the firm for feedback about their performance. Questions include both general and project specific queries such as, “What type of needs analysis was conducted before work initiated?”, “What type of a ROI were you anticipating, what was achieved and in what time frame?”, “What was your total investment?”, “Rate your overall experience (1-10; 10 being the highest)”, “What form of planning and strategy was undertaken by the agency before they started on your project?”, “Do your pages pass W3C standards?”, “Were your pages designed in CSS?”, “Does your website have a search engine friendly design? What components of your design and strategy included SEO?”, “How long did it take the agency to craft out your design? For how many pages?”
