

CoverCase iCase iPod Hard Snake Leather Case Release

Your iPod Gets A Brand New Look With CoverCase's Dual Layered Leather Protectors That Add Just the Right Amount of Attitude and Sophistication.

New York, NY, March 23, 2007 --(PR.com)-- As a compliment to the iPod simplicity and elegance, CoverCase has introduced a special edition of its protector that aesthetically enhances and protects with leather attitude. With just a mere 1.65 millimeters of additional surface, it provides effective all-round protection surrounding the iPod and its screen. The iCase snake leather/suede Edition boasts a dual-layer design that combines a leather front impact/scratch-resistant screen protector with a premium shock absorbing suede layer sporting a scarlet red click wheel and center button gum drop. Together they seamlessly unite with precision to perfectly encapsulate and protect the iPods with smooth lines and sophistication. It also comes fully equipped with a removable rotary belt-clip, warped with leather— making it one of the most comprehensive and stylish ways to keep the iPods safe.

Features:

- Scratch-Resistant screen protector
- Specially coated premium suede protective layer
- Solid belt Clip 2
- Built-in flip closure
- Special Gum Drop Plastic center Button
- Openings for all the ports.

Available now for \$24.99 from www.covercase.com and your favorite retailers soon.
