

JAMPRO Environmental Corporation to be Featured in Story on Improving Air Quality on the Profiles Series

Clementon, NJ, April 01, 2007 --(PR.com)-- JAMPRO Environmental Corporation announced today that the company is to be profiled in a story about improving air quality in the public and private sector. A leading Environmental and Engineering firm, Jampro Environmental strives to be a leader in environmental engineering. “We primarily try to help our clients to protect the air that the workers are exposed to and the public also,” said President and CEO, Courtnie Logan-Iman Afari.

The Profiles Series, hosted by Academy Award winning actor Lou Gossett Jr., informs and educates viewers on variety of topics and issues. It disseminates information to consumers and industry alike. This segment will focus on environmental solutions. Executive Producer Wali Waiters says “we are proud to feature organizations that are helping to improve air quality.”

About “The Profiles Series”

The mission is to create quality programming that will inform, educate and enlighten their viewers both nationally and internationally. They cover a variety of topics ranging from health and medical to business, education and environmental. “The Profiles Series” can be seen on cable networks nationwide and internationally on Voice of America Television. <http://www.profilesseries.com>.
