

Groovytel.com Phone Service for MSN and Google Talk

Super Technologies, Inc. the makers of SuperPhone and DIDX.net announce the beta release of GroovyTEL.com. The service empowers USA and China instant messenger users to receive calls from regular phones anywhere in the world. The DIDX.net and the DID Number Management Solution (www.supertec.com/cfms) powers the call routing, billing and management of the end user.

Pensacola, FL, April 05, 2007 --(PR.com)-- Super Technologies, Inc. the makers of SuperPhone and DIDX.net announce the beta release of GroovyTEL.com

GroovyTel.com offers incoming phone service for any MSN Messenger and Google Talk Messenger user.

The service enables the user to receive a call from any regular phone that is located anywhere in the world, to his MSN and Google Talk Messenger service.

GroovyTel.com takes advantage of 2 key software developed in-house by Super Technologies Inc. The DIDX.net and the DID Number Management Solution (www.supertec.com/cfms) powers the call routing, billing and management of the end user.

GroovyTel.com is offering 1000 free phone numbers on first come first serve bases. The regular rate of the phone numbers are \$2.99 a month, and the service can be used anywhere in the world. The IM users will start receiving calls from people all over the world who are the most important to them via GroovyTel.com service.

"Our focus on the product is to the United States and China market. China has the largest number of IM users in the world. This service helps the IM users to interact with the regular phone world also," says the CTO Rehan Allwahala.

About Groovytel.com

GroovyTEL.com name was a brain child of Suzanne Bowen, CEO Super Technologies, and the service offers incoming phone service to MSN and Google Talk users, anywhere in the world.

About DIDX: DIDX is a global number exchange and peering marketplace that empowers any telecom service provider with the opportunities to buy, sell and/or exchange DID Numbers with other service providers. DIDX software has won 4 awards in 2006, including Pasha award, TMC Product of the Year Award, and Best Communication Change Maker Award Nomination.
