

## **Global Abundance Program is the Ultimate Home Business for This Australian Entrepreneur**

*Global Abundance Program is continuing to amaze the internet business community. The new Titanium package is a perfect companion to the existing marketing powerhouse of G.A.P. The addition of a Travel Portal enables every Titanium member to book their flights, car rental, hotels or indeed their entire vacation, in comfort, from their own computer at home.*

Taringa, Australia, April 19, 2007 --([PR.com](http://PR.com))-- When G.A.P. unveiled new websites and the value plus Titanium package on April 2, Jenny Rogan's home business was shifted into top gear. "Making the up-front decision to position my business at the Titanium level and then acting on that decision, was based on the adage that 'leaders attract leaders'," says Jenny. "I originally joined at the Platinum level. My colleagues now know me as the Smart Platinum Blonde who switched to Titanium."

One of the key benefits for the new home business owner is the ongoing training and support from the Universal Dream Team. Each G.A.P. member is enrolled, at no cost, into the U.D.T. where they have access to over \$10k of software and other resources as well as unlimited help from all of U.D.T.'s leaders and top marketers. Jenny is quick to point out that it has been the "continual encouragement to think and be creative, along with the generous team spirit approach" that has empowered her to move through the grades of learning internet marketing so rapidly. "This is the 21st Century and understanding how to market online as well as offline is an absolute must for a home business owner," says Jenny. "Without understanding and implementing this knowledge, any business becomes too much like hard work... a bit like continually plugging holes in a sinking boat."

"We have taken the best from previous businesses, and included some of our personal "best" practices and ideas, and have combined them into this profitable, positive and value-filled business," says G.A.P. Co-Owner, Tod Bell. "The proof that this is true is found in the fact that we are gaining many of the top marketers on the planet who are seeing the value, and partnering with us to make G.A.P. the best it can be."

With the online home business revolution well underway throughout the world, people are searching for a REAL business built on a solid foundation of integrity, lasting change and products to enhance their lives.
