

Info Security Products Guide Names Activeworx Security Center Winner of the 2007 Global Excellence in Event Management Category

Popular Security Event & Log Management Solution Gains the Highest Trust of Customers Worldwide

Boca Raton, FL, May 11, 2007 --(PR.com)-- CrossTec Corporation (www.CrossTecSecurity.com) announced today that Info Security Products Guide, a Silicon Valley Communications publication and the world's leading publication on security-related products and technologies, has named Activeworx Security Center the winner of the 2007 "Global Excellence Event Management Customer Trust Award." This customer trust honor is the greatest endorsement to the fact that Activeworx is leading the market when it comes to products that provide the most value in Security Information and Event Management, as well as being involved with their customers and the security community as a whole. More than 18,000 end-users and prospective customers worldwide were invited to vote for the products that they trust the most when it comes to protecting their digital resources.

Activeworx Security Center collects, normalizes and analyzes data from virtually any security device or system, from any vendor. At the heart of Activeworx is the powerful Activeworx Event Framework (AEF) which recognizes event data from Firewalls, IDS, IPS, Vulnerability Scanners, Antivirus Applications, Routers, Switches, VPN devices, Windows Event Logs, IIS and SQL, and more... Activeworx Security Center also provides powerful n-tiered backend functionality, such as flexible collection engines utilizing standards based parsing algorithms and memory based correlation engine to identify hidden threats. Activeworx supplies detailed security alerts, vital reports for investigations and regulatory compliance, and deep forensics tools.

"Info Security Products Guide's recognition of Activeworx further validates our product as excellence-in-class and being well ahead of the curve," commented Jeff Richards, VP of CrossTec's Security Division. "Customer Trust is of the utmost importance to every one at CrossTec which is why we continue to offer personalized consulting, one-on-one demonstrations, free technical support and immediate support for new customer devices."

"Security products have continued to evolve rapidly in the past few years and advanced technologies are now making it possible to take a pro-active approach to most security scenarios," said Rake Narang, Managing Editor of Info Security Products Guide. "Organizations of all sizes and in all industries have to deal with real-life threats which may differ vastly from lab simulated environments. These users build a strong 'Customer Trust' for products that best meet their requirements and therefore also play a key role in the security evolution cycle."

About CrossTec Corporation

Since 1999, CrossTec's Activeworx brand security tools (www.crosstecsecurity.com) have been downloaded more than 100,000 times. The flagship product, Activeworx Security Center (ASC), is a cost-effective security information and event management (SIEM) software solution that provides real-time security device log monitoring with correlated alerts, management and compliance reports, log data storage, and tools for advanced, in-depth forensic analysis. CrossTec's mission is to protect organizations by reducing the time it takes to analyze massive amounts of event log data from multiple devices and vendors to produce real-time alerts and vital reports that pinpoint network security breaches.
