

New Real Estate Websites for Realtors Launched

Plano, TX, January 31, 2012 --(PR.com)-- A real estate website company that specializes in creating websites for Realtors and real estate agents, www.RealEstateWebsiteParadise.com, has launched a new offering of real estate websites for real estate agents and Realtors.

The websites are built to generate new clients for real estate agents.

Each website is equipped with informative E-books that house buyers and sellers find useful. In order to access these E-books, they must provide their contact information. The website then takes over with in-built autoresponder marketing email messages that are sent at pre-determined intervals.

These messages provide useful information and encourage these prospects to use services of the Realtor.

Each website is also controlled from a simple virtual back office, from changing designs and content to managing leads and property listings on the website. The entire back office has been built with simplicity in mind so that even a real estate agent who is new to computers can easily manage their website.

A friendly, virtual life-like, video speaking model welcomes visitors commanding instant attention and increasing conversions from visitors to real clients.

Having been equipped with advanced search engine optimization, the each website is built to attract visitors especially targeting their local market.

Also integrated in the websites are tools for social media marketing such as Twitter and Facebook. The websites can be fully customized and adapted to suit the exact business model of the Realtor as well as complete personalization including company name and logo.

Each website comes loaded with numerous designs, each of which can be fully customized to suit individual business needs.

A Realtor can order a website and have it delivered fully customized and ready for business in 1 hour.

Ultimately, each website delivered is fully equipped to run a successful real estate business as well as attract leads and convert them into clients.
