

Eclipsit Announces Microangelo On Display 6 - On Display Allows Users to Customize Vista Desktop Icons, Folders, and Shortcuts

Microangelo On Display can customize your desktop's icon and cursor display like no other icon program. One common dialog changes icons and customizes the appearance of any windows object or folder icon.

Laguna Beach, CA, May 22, 2007 --(PR.com)-- Eclipsit Corporation, a leading provider of icon editing tools, announced the release Microangelo On Display for customizing computer desktop icon and cursor displays. For a detailed feature description, go to <http://www.microangelo.us>.

“We are very excited to bring Microangelo On Display to market,” stated Hugh A. Gray, Vice President of Sales for Eclipsit Corporation, “and are particularly proud of the fact that Microangelo On Display can change almost any icon displayed by Windows Vista; something no other desktop icon utility can currently claim.”

On Display provides one elegant dialog to change any icon. Simply right-click on the icon, select Appearance, and choose a new icon for display. You can also use your favorite JPG, PNG or BMP files and On Display will create an icon for your display.

Gray added, “To make this offering even more tempting, customers who purchase a Microangelo Toolset 6 license will receive Microangelo On Display free. Microangelo Toolset 6 is an award-winning set of tools for creating and editing icons and cursors for all Windows platforms. Combining these applications truly opens the door to our customers to create highly customized and personalized Windows desktop environments.”

Microangelo On Display is available for Windows Vista, Windows XP, or Windows 2000. On Display conforms to specifications required for Vista certification. All files are installed to appropriate system and user locations, and features are securely extended to even the least privileged user.

About Eclipsit Corporation

Based in Laguna Beach, CA, Eclipsit Corporation develops the award-winning Microangelo icon and cursor software and Einstime, a time information manager. Their goal is to provide software, customer service, and technical support that exceed the needs of their customers.
