

Announcing Aftermarket CAT for Aftermarket Caterpillar Engine Parts

Syd's Eastside Auto Parts is very proud to announce that their new website, Aftermarket CAT, is now online and available for public use. Aftermarket CAT represents their further expansion into the aftermarket parts business with a line of superior quality IPD engineered and manufactured aftermarket parts for Caterpillar heavy equipment, marine and highway truck engines.

Yankton, SD, June 05, 2007 --(PR.com)-- Syd's Eastside Auto Parts (SydsAutoParts.com) is very proud to announce that their new website, [Aftermarket CAT.com](http://AftermarketCAT.com), is now online and available for public use. Aftermarket CAT represents their further expansion into the aftermarket parts business with a line of superior quality IPD engineered and manufactured aftermarket parts for Caterpillar heavy equipment, marine and highway truck engines.

Syd's Eastside Auto Parts is a brand of Syd's Eastside Auto Salvage, Inc., which also sells new aftermarket auto parts, as well as used recycled auto parts. With the introduction of AftermarketCAT, Syd's Eastside has extended its new aftermarket product offerings as well as its customer base with the addition of a superior line of new IPD engineered aftermarket engine part products for Caterpillar motors. Aftermarket CAT was started in an attempt to keep the Syd's Eastside Auto Parts brands separate and focused on their automotive markets, while expanding into the CAT diesel and natural engine aftermarket parts under a new brand.

Aftermarket Cat is much more than a new website in the Syd's Eastside portfolio, it represents a brand dedicated to assisting CAT owners and mechanics by allowing them to save money on quality premium aftermarket IPD engineered CAT motor parts. These IPD aftermarket Caterpillar engine components offer superior performance with no sacrifice to reliability.

Aftermarket CAT is also an extension of the expertise found through their sister company, Feimer Construction Company, which often employs some of the machinery that the parts which power these machines employ. In fact, it was FCC's search for high quality aftermarket Caterpillar replacement parts which had fueled their interest into becoming an IPD dealer and distributor.

Aftermarket CAT solely concentrates on providing high quality, high performance, superior engineered aftermarket Caterpillar (CAT) engine parts and gasket kits from IPD. IPD concentrates on engineering and manufacturing components for heavy equipment and industrial motors that exceed factory specs and introduce better performance without any risk to reliability.

Customers can order a parts quote for parts by either the part name for a given CAT engine configuration, or by actual CAT part numbers, or IPD part numbers. Upon receiving a parts quote request, their staff will look up the availability and price of the parts in question and issue the customer a quote for the parts indicated.

Customers can either approve the entire quoted order, or approve each part individually. Upon quote approval, Aftermarket CAT will order your parts and confirm your order.

Stop in and check out the many IPD catalogs and brochures that are available online. IPD parts are available for the following Series of CAT engines: 3126, 3406, 3408, 3412, 3508, 3512, 3516, C12, 353, 379, 398, 399, 3304, 3306, D339, D342, G342, D343, G353, D346, D342, 3204, 3208, 3114 and the 3116.

Parts kits available include complete rebuild kits and complete rebuild gasket kits. Most any individual engine parts required for a rebuild are also available.

Even though the website is young, they encourage interested parties to visit. If you have any comments or critiques of the website, they would love to hear it. Or if you would like to suggest something that they haven't covered, they appreciate all feedback. Please feel free leave them a comment, even if it is just to say "Hi."

"We hope to serve you soon."
