

Global Abundance Program to Upgrade its Mortgage Reduction Program

The Global Abundance Program announces an important upgrade to its Mortgage Reduction Program, making it more personalised and more powerful than before.

Minden, NV, June 22, 2007 --(PR.com)-- Abledragon Marketing is an Independent Business Owner of the Global Abundance Program.

The Global Abundance Program recently announced an upgrade for its Mortgage Reduction Program, to make it even more powerful and beneficial for clients.

The program is being renamed as the Mortgage Acceleration Plus (MAP) program and features individual consulting, counseling and planning for each client to ensure that their overall costs of buying their home are dramatically reduced.

To quote G.A.P., the commitment is to provide “A quick rollout of advanced leverage, mortgage planning and mortgage management techniques, which will reliably empower and enable you to dramatically reduce your overall lifetime cost of borrowing and [thereby] build wealth, while limiting risk and not spending more “out of pocket” than you would without the plan.”

The new Mortgage Accelerator Plan will be available from the beginning of July. Please note: this is currently only available to US residents, but watch this space as G.A.P. will be extending it to other markets in the future.

For more information on the Global Abundance Program or the Mortgage Acceleration Plus program contact the writer or visit the website below.
