

## **Commonwealth Capital Advisor's New Software System Simplifies Financing for Small Businesses**

*Expert System Enables Entrepreneurs to Control Their Own Financing at Low Cost.*

Chicago, IL, July 02, 2007 --(PR.com)-- Commonwealth Capital Advisors (CCA) today introduced new software modules with in The Financial Architect System™ that simplifies financing for start-up and early-stage companies. The easy-to-use software system generates investor leads and the required securities offering documents for issuing “Seed Capital Convertible Bridge Notes™,” a simple and rapid form of financing for small companies.

CCA is an investment banking advisory firm that has developed a patent-pending methodology called The Financial Architect System™ that is designed to enable entrepreneurs and small business owners to raise substantial amounts of capital at a fraction of the standard cost.

“The goals of The Financial Architect System™, and the module we're announcing today for convertible bridge note financing, are simple,” said Timothy Hogan, CCA's chairman and CEO. “We want to help entrepreneurs significantly lower the costs and increase the speed of raising capital. Just as important, we want to provide business owners with an easy-to-use expert system that will enable them to choose the right deal structure for capital they need.

“Using our system, an entrepreneur can create the necessary documents for convertible bridge notes in an afternoon and start raising capital the same day,” Hogan noted. “To raise additional capital using our system, a client can then produce a securities-offering document, for legal counsel review, compliant with Regulation D of the Securities Act of 1933 in as little as 30 hours which is a fraction of the time and cost it would take using conventional methods.

“We believe there's significant and growing demand among business owners for control over their financing strategies. The software components of The Financial Architect System™ are designed to meet this 'do-it-yourself' approach,” he concluded.

### About Commonwealth Capital Advisors, LLC

Commonwealth Capital Advisors is an investment banking advisory firm with representation in Chicago, Harbor Springs, MI, and other locations in the United States as well as internationally. The firm has provided conventional investment advisory services to public and private business since it was established in 1998, and has spent the last four years developing The Financial Architect System™ as a complete expert system for start-up, early-stage and seasoned companies, both public and private, that seek capital.

CCA's software allows clients to evaluate and create securities-offering documents for deal structures including common equity, notes with equity kickers, participating preferred shares, and common equity with bank debt.

In addition to its capital raising software, the firm provides clients with access to accredited "angel" investors, private equity funds, hedge funds, registered investment advisors, broker-dealers and many other sources of capital, around the world, that have an interest in funding start-up and early-stage companies. Access to this "Commonwealth Capital Club" network is on a password-protected area of CCA's website and is part of The Financial Architect System™

More information on CCA is at: [www.CommonwealthCapital.com/members/4750](http://www.CommonwealthCapital.com/members/4750) or their International web site: [www.CCAIntl.co.uk](http://www.CCAIntl.co.uk) For a limited time, CCA is offering its comprehensive proprietary guide to financing, The Secrets of Wall Street - Raising Capital for Start-Up and Early-Stage Companies, at no cost through the above links.
