

i-Shop for Things Announces Drop Shipping Web Site Plans in Affiliation with DropshipDesign.com LLC

i-Shop for Things and DropshipDesign.com LLC are offering several different drop shipping plans to satisfy any budget.

Bethlehem, PA, July 19, 2007 --(PR.com)-- All the products offered are shipped directly from the manufacturers and/or from legitimate distributors that can provide the lowest wholesale prices available online. The Drop Ship web sites will be provided with all the tools and services needed, while the subscriber focuses on marketing and advertising the products. Everything else is managed by DropshipDesign.com LLC.

Dropship reselling packages include the Basic Plan, Auction Plan, Website Plan, and the Combo Plan. Features include 24 hours access, complete order fulfillment, an exceptional selection of wholesale products, and a growing inventory of the latest products available, Drop shipping services with no minimum order, and unprecedented customer service.

i-Shop for Things is a Bethlehem, PA company now offering Drop Ship Reseller Packages, in addition to Web Hosting, Search Engine Optimization, and Search Engine Marketing services.

The Drop Ship Website plan provides clients with a Website that is fully integrated with the product suppliers. The website will be updated daily, directly from the suppliers with the most recent content. New products will automatically be added to the website. There are no monthly fees. There is only a one time setup fee and a yearly renewal fee.

The Website plan allows clients to add their own products with no additional fees. Clients can list and sell their own products and no fees will be deducted from the transaction. These plans also pay the paypal fees and the credit card fees on purchases made from the Website plan.

The Auction plan offers special incentives to auction websites such as a free premium storefront (like an eBay store) for one year and no listing fees on up to 1,000 items. The eBay ad Wizard will help list items on eBay with a few simple clicks.

There are thousands of products available to subscribers at unbeatable wholesale prices for resale to their customers. DropshipDesign.com LLC constantly makes deals with new manufacturers from trade shows in an effort to offer the latest items to hit the market. Be the first ones to start selling the latest and hottest item on eBay. There is no need to pay up front for inventory, products are stocked and shipped directly to the customer.

Products are drop shipped anywhere in the USA with no minimum purchase. The web sites are eBay friendly. The quantity in stock is updated daily to identify items that will still be in stock when the eBay auction ends.

All the orders are handled automatically, including returns, and customer service tickets. Since orders are fulfilled automatically, there is a legitimate interest in keeping customers happy, and returning. No need for a merchant account since transactions are captured and processed automatically.

Each website can be personalized by choosing from a selection of templates and by adding custom code such as banners, forms, and links, etc.
