

## **Texas Right of Way Associates Launches Innovative In-House Professional Land Survey Division**

*Barnett Shale- Texas Right of Way Associates (TRWA, Inc.) Now has a full service In-House Professional Land Survey Division in that will begin to work in conjunction with their Right of Way Agents currently working on projects in the Barnett Shale and throughout Texas.*

Fort Worth, TX, August 10, 2007 --(PR.com)-- TRWA, Inc. (Texas Right of Way Associates) announced today that they will begin offering a survey division in conjunction with their right of way acquisitions firm. “Our survey division offers over 70 years of combined experience in the field of professional land surveying,” says, Don Valden, CEO of TRWA, Inc. Targeting the Barnett Shale, and with statewide capabilities, the company will provide preliminary design survey, ALTA/ ASCM As-built, oil and natural gas pipeline alignment route and right of way surveys, construction staking and many other phases.

When Valden was asked why TRWA, Inc. wanted to get into the business of land survey, Valden answered “We noticed the largest disconnect in the right of way process is the communication between right of way agents and the survey company. With the survey and the right of way division under one roof, it will make us much more efficient and accountable to our clients. What also makes our in-house survey division different from the rest is the physical distance between the survey company and the right of way agents field office. Our turn-key process will make us more efficient, which in turn, will please our clients.”

TRWA's President, Ted Valdez, says “The Barnett Shale is different because so much of the drilling occurs in urban areas. Survey companies are overwhelmed with the demand of multiple projects, re-routes and physical obstructions.”

What sets TRWA's survey division apart from other survey companies is TRWA's three in-house Registered Professional Land Surveyors (RPLS) and two Professional Draftsmen. TRWA's survey division utilizes state-of-the-art equipment for its survey division and can provide multiple crew chiefs and crews as needed.

Texas Right of Way Associates, Inc. is a Professional Right of Way Acquisition firm dedicated to serving the needs of the Oil & Gas industry and the Energy Companies currently working in the Barnett Shale play.

Texas Right of Way Associates, Inc. has over 25 years experience in the Oil & Gas Industry and 3 years experience in the Barnett Shale.

Texas Right of Way Associates, Inc. is the only right of way acquisition firm conducting professional training classes for future Right of Way Agents.
