

Plasma Rentals Up Over 200%

Plasma displays create a high quality image for corporate events and rentals of these types of displays are up over 200% year over year.

Washington, DC, December 15, 2005 --(PR.com)-- Rentacomputer.com Tech Travel Agent Darcy Mann says that Large Plasma Flat Panel Displays are up over 200% for her this year.

"People are especially renting plasmas for conventions and trade shows in Las Vegas, Chicago and Orlando."

Trade Show Organizers are renting floor standing and wall mounted plasmas to enhance their image as well as inform visitors of upcoming events and trade show floor mapping.

Trade Show Exhibitors especially are opting to rent 42" and Larger Flat Panel Plasma displays for their trade show booths.

"Large 42" Plasma's are a very, very popular thing to rent for trade show booths. People have elaborate PowerPoint presentations that look excellent on our floor standing plasma display rental unit. It's right in your face marketing for everyone passing by your trade show booth." Janine Foster, Tech Travel Agent for Rentacomputer.com.

Plasma displays create the highest quality image available for corporate events such as conventions and conferences. Plasma screens play full motion video with the highest quality possible. But plasma displays carry additional risk and inconvenience during transport. That's why it's best to rent plasmas for your trade show, convention or conference.

Plasma Rentals is the most cost effective option for Trade Shows.

Even if you attend more than one trade show per month, the costs of deployment, insurance and frequent replacement make renting plasma flat screen displays a convenient and viable option.
