

## **NewGenTek Takes the Sting Out of Compliance**

Redondo Beach, CA, August 14, 2007 --(PR.com)-- NewGenTek's Compliance suite "Channel Islands Compliance Center" simplifies compliance with regulations such as, SOX, Hipaa, and GLBA. Channel Islands Compliance Center automates financial and IT controls across the enterprise. The Compliance Monitoring and Reporting features allow an organization to see where it is in real time to ensure compliance. Channel Islands Compliance Center integrates with most applications, operating systems, and databases including legacy systems.

Channel Islands Compliance Center's unified database stores information about all your systems in one place and allow for monitoring and reporting of compliance data across all platforms. Channel Islands Compliance Center provides rule based management of all systems as well. The easy to configure rules allow an organization to define the events that should occur when compliance issues arise. Events include notification via phone, email, and popup, as well as the ability to take action on the event such as disabling accounts or replacing configurations. More information and a demonstration is available at [www.newgentek.com](http://www.newgentek.com) and [www.ecompliancebox.com](http://www.ecompliancebox.com)
