

BioHealthRx Joins SmartPost Job Posting Distribution Network

Louisville, KY, August 20, 2007 --(PR.com)-- As every recruiter knows, manually posting jobs is a tedious time consuming process. BioHealthRx, a fast growing medical job board, has recently partnered with SmartPost to assist in the elimination of such tasks.

SmartPost is a leading job posting distribution service owned by Bernard Hodes Group, one of the largest recruitment and marketing communications agencies in the world. The service aggregates job postings to BioHealthRx making it easier for recruiters to post jobs to the site. "We are extremely excited in joining SmartPost network," states Jeri Lyskowinski, President and CEO of BioHealthRx. The technology streamlines the transmission into a time saving process for employers. Time constraints are inevitable as employers have very little time to manually post jobs. "As a previous recruiter I understand and can relate to the mundane never-ending task of manually posting jobs" adds Lyskowinski. Employers will be able to post single job postings and are able to add additional posting credits if needed.

The seamless integration of SmartPost and BioHealthRx allows employers to measure results of job applicants, job posting views, and ROI. "With the increase in rising health care costs it is the up most importance to track your results and to know that your money is being well spent" states Lyskowinski.

BioHealthRx strives to make employers jobs easier and hire candidates more efficiently and less expensive by adding features such as skills assessments, questionnaires, applicant tracking systems, fresh resumes, competitive unlimited job posting rates, employers may add a video to sell their company to a job seeker, cross posting to major and niche jobboards, and much more. The job board is powered by HRsmart, a leader in ATS software.

AboutBioHealthRx

Founded by CEO and President Jeri Lyskowinski, BioHealthRx is a career site and resource center for the biotechnology, healthcare and pharmaceutical industries. It was founded with a desire to provide a single-resource for the busy medical professional.
