

On September 11, It Will be Six Years Since the Attack on the Twin Towers. We Promised We Would Not Forget Them.

On September 11, it will be six years since the attack on the twin towers. Many of the rescue workers who survived, continue to deal with medical issues. "We promised we would not forget them."

New York, NY, August 28, 2007 --(PR.com)-- MYSafetyMark™, in conjunction with the NYDetox Center, announced it has established a Fund Raiser to help the New York Rescue Workers Detoxification Project. The NY Detox Project has helped over 800 rescue workers regain their quality of life who were suffering from the effects of toxic exposures during the rescue and recovery efforts following the September 11th attack on the World Trade Center.

The attack on the WTC towers, and their subsequent collapse, brought unprecedented toxic exposures, beginning with a dust storm of pulverized concrete, steel, asbestos, carpeting, office equipment and other matter.

Individuals who participated in the 9/11 rescue and recovery operations are the first priority for detoxification. This includes firefighters, police, paramedics and other EMS workers, sanitation workers, construction workers, volunteers, etc.

MYSafetyMark™, an International Company which sells a global online Personal and Pet retrieval service, has created a web page for people to purchase the combined system for \$19.95. \$15.95 of each purchase (80%) goes directly to the project.

We promised the workers who risked their lives and the families of the workers who died as a result of this tragedy, we would not forget them. Help them by helping us reach our goal in getting more rescue workers onto their programs.
