

Online Casino Portal Review New RTG Slots Games

Leading online casino and slot machine portal, <http://www.new-online-slots.com>, reviews the latest video slots released by software provider Real Time Gaming on. Players have three new video slots games to choose from.

Johannesburg, South Africa, September 01, 2007 --(PR.com)-- New Online Slots is an online slots portal that serves as a guide for slots players from anywhere in the world to find guidance about slot machine games, online slot casinos, gambling promotions and slots reward programs.

The casino portal reviews new slots games in-depth as and when they are released by the various online casino software companies and their silenced slots casinos. This last release of new games is from leading software house Real Time Gaming (RTG), and the games can be played at their licensees' online casinos. Real Time Gaming upgraded their slots platform when they released their "Real Series" platform last year and the results have been phenomenal with slots players raving over the graphics and features in these games. Land-based slots players in particular have loved the games as they closely resemble many games you will find in land casinos.

The new games each have a unique theme and some interesting features. They all have the 5 reel, 20 pay line format in common. First up in the release is the ancient themed Incan Goddess, which comes with not only free spins, but also a double up gambling feature. The second game is Green Light, with its pedal to the metal car racing theme and a fat tire burning 10,000 coins jackpot and free spins with a multiplier up to a monster 100 times your line bet. This makes the games quite unique as it is a very large multiplier. The third games is a little tongue in cheek. Tally Ho video slot that has a First World War inspired aircraft theme. This game also has free spins, with a 10,000 coin jackpot. "Whether you like old aircraft, cars, or a bit of ancient mystique, one of the games should appeal to you," says Ryan D, editor in chief at New Online Slots. The slots guide reviews all the games in detail (accessible from their home page).

The unique Random Jackpot feature is another stand-out feature in these games. It is awarded completely at random when players leave a game, and has been won often at most casinos that use the RTG software. "The random jackpot is another great reason to visit one of our recommended RTG casinos and we have seen them drop for over \$3000 quite often," says Ryan.

New Online Slots recommends a number of RTG casinos that offer players something extra. "There are many choices for slots players who look for new games. RTG have granted quite a few new licenses this year," says Ryan "Through our research and as regular slots players we believe there to be a handful of RTG casinos that stand out above the crowd in terms of promos, customer service levels, and their reputation for fast and reliable payouts." Such online casinos are all featured New Online Slots website.

In addition to hundreds of [slots machine game](#) reviews, New-Online-Slots.com provides information about online slots casinos. They rate some of the best online slots bonuses, and publish regular free articles for slots players covering many topics such as, game strategies and money management.
