

On-Site Shred Commences Operations for Greater Houston

Houston, TX, September 30, 2007 --(PR.com)-- On-Site Shred, a secure mobile document destruction shredding company, is now providing professional mobile shredding services for Greater Houston. On-Site Shred is locally owned and operated and provides service within a 60-mile radius of Houston.

“We are extremely pleased to begin operations as it enables us to provide high-security shredding to the Greater Houston community”, said company president Peter Miller. “Identity theft is the fastest growing crime affecting 10 million people each year and costing 50 billion dollars. Protecting your customers and yourself is no longer something that can be taken lightly in today's world”. Identity theft is the fastest growing crime in the United States and Houston is the No. 1 spot for this crime in Texas. Every month an average of 340 Houstonians report crimes involving credit and debit cards. Identity thieves commonly obtain paper documents that contain sensitive personal information, including names, addresses, Social Security numbers, bank account numbers and other personal information. Too often, identity thieves have easy access to sensitive information because documents have not been properly discarded. Trash bins outside of homes or businesses contain personal information that identity thieves can use to inflict financial disaster on unsuspecting consumers. The company provides residential and commercial service. For more information, call (281)292-2280 or visit www.shreddingHouston.net.
