

## **(BRRN) Bathtub Refinishing Referral Network Offering Greener Paint Products for 2008. Diy Resurfacing Market to Benefit.**

*Bathtub refinishing and reglazing industry to follow new government guidelines for paint coating manufactures. California based Bathtub Refinishing Referral Network leading the way by introducing low VOC bathtub refinishing coatings to the do-it-yourself market.*

Livermore, CA, October 03, 2007 --(PR.com)-- Northern California based [Bathtub Refinishing Referral Network](#) has approved distribution of the company's new bathtub resurfacing product line for 2008. The greener, more environmentally friendly bathtub repair coatings fall in line with new government guidelines for low VOC compliant paints. Consumers in the do-it-yourself markets are most likely to reap the benefits as these cleaner, less toxic paint coatings enter distribution within the United States.

Sales of do-it-yourself bathtub refinishing and repair products has tripled since 2001. This is due to advances in paint coating technology and the introduction of bonding agent primers included with products sold by companies like the Bathtub Refinishing Referral Network.
