

Producer Pack Release Love House Records - Sample Pack

Producer Pack has announced a new download pack called Love House Records – Sample Pack now available for download

Birmingham, United Kingdom, October 12, 2007 --(PR.com)-- Producer Pack announce the release of Love House Records - Sample Pack to provide Soulful, Funky & Afro House producers with beats, loops & samples to create big room, chunky & funky House music tracks. Love House contains over 300 files of up to the minute samples to rock any club dance floor.

This pack is upfront and contains cutting edge club track essentials produced by one of the UK's most respected dance producers, Jeremy Sylvester of Love House Records, Stealth Recordings and Azuli Records. It contains over 80MB of wav files suitable for most software instruments that use .wav format.

House music is a style of electronic dance music that was developed by dance club Djs in Chicago in the early to mid-1980s. House music is strongly influenced by elements of the late 1970s soul- and funk-infused dance music style of disco. House music takes disco's use of a prominent bass drum on every beat and developed a new style by mixing in a heavy electronic synthesizer bassline, electronic drums , electronic effects, funk and pop samples, and reverb - or delay-enhanced vocals.

This product is available for £24.95 as a digital download and available from Producer Pack.
