

Finding "Made in USA" Products the Easy Way

A website provides data to the consumer regarding what products are made in the US and where they can be purchased. The website www.madebyyankees.net has been developed to assist consumers in finding domestically made goods, fast and easy.

Philadelphia, PA, November 18, 2007 --(PR.com)-- The recent down turn in the economy should encourage us to purchase locally and domestically. But, how can that be done when the average consumer finds "Made in China" labels on almost every box? The Made By Yankees website has resolved that problem.

Made by Yankees has one sole purpose; provide data to the consumer regarding what products are made in the US and where they can be purchased. The website www.madebyyankees.net has been developed to assist consumers in finding exactly what they are looking for, fast and easy. This is a no non-sense exclusive database providing consumers the names of American made products and retailers with out spending a lot of time looking at boxes or surfing the web. The range of products to be found on this site includes household products, clothing, footwear, sporting goods, toys and tools.

Tammy Turner, owner of the newly formed business, experienced the frustrations over finding and purchasing "Made in USA" products. Though searching the web revealed a dozen or so websites focusing on Made in USA products, they were confusing and time consuming. The decision to act on this roadblock came in July 2007 after conversations with other frustrated consumers. The intent of the database is to bring together the "Made in USA" consumer, businesses that have "Made in USA" products to offer. This is a win-win situation for everyone. Consumers have free access to information and businesses can make their products known. Consumers who cannot find a specific domestically made product and businesses whose products are not currently listed in the database may contact Tammy Turner via yankee617@gmail.com or 1-888-816-Easy (3279), or madebyyankees.net.
