Antenna House Inc., worldwide leader in XML Formatting software, announced the introduction of their PDF products to the North American markets.

Rainbow PDF® Software is a family of commercial software tools which assist enterprise and desktop users with electronic document conversion and control.

Full product information is available at www.rainbowpdf.com.

Wilmington, DE, November 20, 2007 --(PR.com)-- Antenna House Inc., a Tokyo based software manufacturer and the worldwide leader in XML Formatting software, announced the introduction of their PDF products to the United States and European markets on Thursday November 1.

Rainbow PDF® Software is a family of commercial software tools which assist enterprise and desktop users with electronic document conversion and control.

Antenna House will initially offer users operating in a server environment two products. The first is a high speed Server Based Converter to convert Office documents and other formats to PDF, SVG and thumbnails without the need to install Microsoft or Adobe products. The second is an Electronic Signature Module which offers users the ability to add Electronic Signatures and timestamps to critical business Documents.

For desktop users Antenna House is offering a product to convert PDF to more flexible formats such as MS Word, Excel and text. Other PDF products already filling market needs in Japan, will be introduced in the first quarter of 2008. All software is available for trial and purchase on the new Rainbow PDF website. www.rainbowpdf.com.

Initial US Product offerings:

Rainbow PDF Server Based Converter converts Microsoft Office documents into PDF, SVG, JPEG/PNG in addition to performing a wide range of other conversions. It does not require the user to install Microsoft or Adobe software to generate conversions and has the unique ability to create JPEG/PNG thumbnails to reduce search time when users are trying to locate documents. Because their converter can output to SVG tiny, it is the ideal tool for converting documents that are sent to field devices such as mobile phones or portable data terminals. Rainbow Server Based Converter operates on a Windows, Solaris or Linux platform.

Rainbow PDF Digital Signature library allows users to select and control distribution of PDF's, verify the senders identity, and insure that the contents of a document have not been altered.

Rainbow Desktop Converter is intended for the small business and personal market. It is a standalone product for converting portable document format (PDF) files to Microsoft Word, Microsoft Excel or text.

Antenna House, Inc. is a premier software company founded in 1984 in Tokyo, Japan. Their mission is to create and sell products to make data useful. They take pride in providing their customers with both

online knowledge-base access and personal technical support.
