

## **An Insanely Healthy Energy Drink? Is That Even Possible?**

*V 4 Health LLC of Denver, CO has recently agreed to represent 2 new products, both from Vemma International -- Vemma Nutritional Supplement and Verve! energy drink. Both products have received high praise from the health, sports and medical industries.*

Denver, CO, November 24, 2007 --(PR.com)-- V 4 Health LLC of Denver, CO has recently agreed to represent 2 new products, both from Vemma International -- Vemma Nutritional Supplement and Verve! energy drink.

Vemma Nutritional Supplement has the full spectrum of 12 vitamins in amounts currently recommended for optimal health; 65 major, trace and ultra-trace plant-sourced minerals; organic aloe vera; organic decaffeinated green tea; and the latest and most potent antioxidant-laden fruit to hit North America - Mangosteen.

Verve! is the latest energy drink to enter the cutthroat beverage market. Verve!'s hook is that it is a healthy energy drink, unlike any other energy drink on the market today. Verve! contains 2 oz. of Vemma, 8 oz. pure sparkling water and a proprietary energy and amino acid blend. Verve! comes in a tropical fruit flavor that salutes the Mangosteen's origins in southeast Asia.

Both products have received high praise from the health, sports and medical industries. Says the founder of [V 4 Health](#), Gina Hendershot, "Prominent healthcare professionals and professional athletes are touting the benefits of these two products. Doctors and nutritionists all over the country are taking these products and strongly encouraging their patients to do so. Vemma is seen as an integral part in America's struggle to get and stay healthy; and can be taken by anyone age 2 to 102."

V 4 Health LLC and Vemma support HealthCorps, the organization whose mission is to educate school-aged children about nutrition, athleticism and mental health to fulfill the critical need to empower youth to live a healthier and self-fulfilled lifestyle. Vemma is currently distributed in 44 countries.
