

## **DIDX Media Sponsor, VON Mexico/Expo Comm/Linux World Mexico 2008**

*Super Technologies, Inc's DIDX is selected as a VON Mexico, Expo Comm, and Linux World Mexico February 26-28, 2008 media sponsor all in one place, Centro Banamex, Mexico City. Other media sponsors include VON Magazine. In 2007, 25,000 qualified buyers visited the exhibits, a magnificent number. Mexico is a hub of Latin American business, and all individuals and companies ready to do business, share information with and gain partners with international entities should register and attend.*

Pensacola, FL, January 04, 2008 --([PR.com](http://PR.com))-- Super Technologies, Inc's DIDX is selected as a VON Mexico, Expo Comm, and Linux World Mexico February 26-28, 2008 media sponsor all in one place, Centro Banamex, Mexico City. Other media sponsors include the highly respected VON Magazine at [vonmag.com](http://vonmag.com), Convergencia Latina at [convergencialatina.com](http://convergencialatina.com), and Telesemana at [tele-semana.com](http://tele-semana.com). In 2007, 25,000 qualified buyers visited the exhibits, a magnificent number. Mexico is a hub of Latin American business, and all individuals and companies ready to do business, share information with and gain partners with international entities should register and attend.

VON Mexico will showcase the full breadth of FMC this year. Unlike even the most advanced countries of the world, Mexico is able to take advantage of 3G and 4G opportunities very quickly and with far greater benefit to the user. In such a scenario, most implementations and services can be rolled out in a way that minimizes capital impact.

VoIP is at the center of most internet protocol-based opportunities. Networks in Mexico and the Latin and South American countries are embracing IP-based choices. In turn, telcos, enterprise, and SMB are more open to IP solutions and partnerships.

So why come to Mexico for this year's VON, Expo Comm and Linux World conferences and expos? Three of the world's most respected events in one place; speakers such as Scott Bradner, University Technology Security Officer, Harvard University and Gabriela Lago-Mendia, Marketing Director Latin America and Caribbean, Telcordia. Mexico is clearly a major communications hub for Latin America. For service providers, developers, systems integrators, resellers, hardware and software vendors, and any communications experts in the region, VON Mexico will bring new insights and opportunities for those looking to profit from the many opportunities available in Latin America today.

Suzanne Bowen, CEO of Super Technologies, Inc. and DIDX joins the events' coordinators in the statement, "Morganstanley.com, in one of its recent global economic forums states, 'In particular, we suspect that moves on the energy and telecom fronts could come next year...' Join us in Mexico City at VON Mexico, Expo Comm and Linux World Mexico Feb. 23-26, 2008. We do not want to miss you there."
