

OurChurch.Com Launches NE1™ Website Builder

Tampa, FL, January 04, 2008 --(PR.com)-- OurChurch.Com, a leading provider of web hosting, design, marketing, and advertising services to Christian organizations and individuals, has launched its new NE1™ Website Builder. NE1™ was developed for the Internet novice, the experienced website administrator, and anyone in between.

OurChurch.Com released its first website builder, BEACON, in 1996 and has released updated versions of BEACON over the last decade. Like its predecessor, NE1™ appeals to novice Internet users with its easy-to-use control panel. However, this next-generation website builder also meets the needs of experienced website administrators with its professional designs and interactive functionalities including eNewsletters, blogs, photo albums with slideshow, streaming audio and video, eCommerce, prayer requests, online donations, and more.

“We understand there is a huge need for Christian organizations to not only have an internet presence, but to have a dynamic website that will truly fulfill the needs of the organization both in design and capability,” stated Mark Steinbrueck, President of OurChurch.Com. “We developed NE1™ to meet those needs - to be a website builder for anyone, at anytime, from anywhere.”

Unlike many other boxed web builders, NE1™ is not software that needs to be installed onto a computer in order to be used. It runs on OurChurch.Com's servers, so web administrators can build and maintain their website anywhere the Internet can be accessed.

The NE1 Website Builder is included at no extra cost in all OurChurch.Com website hosting packages, including its free web hosting service.

More information about OurChurch.Com's [NE1™ web builder](http://www.ourchurch.com/NE1) is available at:
