

## **NuU Medical Spa Introduces ContrAge™ to the United States**

Schaumburg, IL, January 11, 2008 --(PR.com)-- NuU Medical Spa, located in Illinois and Arizona, have added the newest skin tightening procedure, ContrAge™ to their menu of services. ContrAge™ promises to tighten wrinkled and sagging skin on multiple body parts through state-of-the-art technology from Spain. Nu U will be the first in the country to introduce this cutting-edge technology.

ContrAge™ is a facial rejuvenation / body sculpting program that delivers radiofrequency or (RF) deep into the dermis layer of the skin. This RF causes soft tissue coagulation which leads to remodeling of the collagen within the dermis. The remodeled collagen fills in wrinkles and sagging, for overall skin tightening. In addition, the RF function serves as an overall repair mechanism for tired or aging skin creating a strengthening and reconditioning of the dermis.

“We are very pleased to offer this breakthrough system to our customers,” says Norm Valine, owner of NuU Medspas. Norm adds, “This technology offers not only breakthrough skin tightening options, but also helps the skin's texture and spider veins.”

ContrAge™ has been used on many body parts including the face, arms, legs, buttocks, abdomen and other areas.

ContrAge™ has been referred to as the “non-surgical facelift” with minimal pain, no downtime, and a fraction of the cost of plastic surgery. Five treatments is recommended for long-lasting results.

NuU's highly qualified medical staff always assembles a treatment package that is most suitable for the clients desired result. At NuU, it's all about you and the skin you're in.

NuU provides multiple rejuvenating, non-invasive procedures to improve skin texture, fine lines and wrinkles including; fillers such as botox® and restylane®, facials for every skin type, laser hair and vein removal and skin tightening.
