

Physician and Artist Opens Medical Aesthetic Center "Visage MedArt" in Nashville

Nashville, TN, February 10, 2008 --(PR.com)-- VISage MedArt is a Medical Aesthetic and Anti-Aging center that has opened its door on February 7, 2008 in Bellevue area in Nashville, TN.

The center is owned by the physician and international artist Marek Kacki, MD who introduces classical concept of beauty into medical aesthetic procedures. In addition to state-of-the-art laser technology, the center's main focus is on a face and hand sculpting and restoration of youthful inherited beauty using various dermal fillers and Botox.

The main goal of Dr. Kacki is to restore natural features according to the historically accepted artistic proportions and relative symmetry without commonly recognizable and unnatural overfill and overexpansion of treated areas.

One of the unusual activities is to gain industry support in treating patients with post-traumatic tissue deficits as well as those suffering from facial lipoatrophy.

VISage MedArt offers a significant and permanent discount for artists and teachers as well as special pricing on combined therapies.
