

## **Tornado's and Hurricanes Defeated. The Hurricane Hutch & Tornado Tank to be Shown at the Orlando Home Builders Conf.**

*The Hurricane Hutch Corp. proudly unveils the launch of the Hurricane Hutch & Tornado Tank. The heavy steel container is made with over 175 pounds of high grade steel, is water tight and has been tested by the world renowned Texas Tech Wind Science Center to withstand a Cat5 Hurricane or F-4 Tornado. It can withstand over 125,000 pounds of pressure. Protect personal property, either in your house or outside. Come see them at International Builders Show, Feb. 13th-16th in Orlando.*

Orlando, FL, February 11, 2008 --(PR.com)-- Defend Your Personal Property against F4 Tornadoes or CAT-5 Hurricanes. The Hurricane Hutch and Tornado Tank are the only independently tested and proven safe havens for your personal property in any storm.

If a CAT5 hurricane, or F4 tornado were to hit your home tomorrow, what would you take with you? How would you quickly protect the valuables you had to leave behind? Now you can safeguard your goods from any hurricane, tornado, or storm.

Come see the Hurricane Hutch Corp. at Booth W7011 at the International Builders Show/Next BUILD in Orlando Florida at the Orange County Convention Center February 13th-16th.

With the "Hurricane Hutch" and "Tornado Tank" you can rest assured your most valued possessions will be safe either inside your home or secured outside from any storm. Your valuables will be there safe and sound upon your return. Come see the "Hurricane Hutch" and the new "Tornado Tank" on display and on sale for the first time after more than 2 years of testing and development.

"The Hurricane Hutch" and its sister product, "The Tornado Tank," are huge (over 7 cu feet of storage space), 10-gauge steel watertight containers which have been independently tested to withstand impacts from winds of up to 250 mph, including major debris strikes, while keeping your possessions safe and dry. Anchored deep into your concrete slab using the same bolting system as the US Air Force to bolt down their aircraft hangars, nothing will move your "Hurricane Hutch" as it protects and preserves your valuables.

The patent pending "Hurricane Hutch" and "Tornado Tank" were tested at the world renowned Texas Tech University Wind Science Engineering Research Center Debris Impact Facility and passed all impact tests. The 175 pound "Hurricane Hutch" and "Tornado Tank" boast walls up to 110% thicker than traditional safes, are watertight, have specially designed locks, are child-safe and have up to 7 times the capacity of a traditional safe, while also being able to withstand over 100,000 pounds of pulling pressure after being anchored deep into you concrete floor. Ideal for summer homes and homes that lie in the path of tornadoes, hurricanes, or anywhere significant storm events occur.

Both the "Hurricane Hutch" and the "Tornado Tank" have withstood the winds and debris strikes associated with CAT 5 hurricanes and F4 tornadoes. (The testers were unable to replicate an F5 tornado).

Proudly made in the USA to exacting US military standards, the revolutionary "Hurricane Hutch" and "Tornado Tank" are the only personal property containers specifically designed to withstand the worst storm events. Protect your photos, collectibles, cherished items and memories from nature's wrath by purchasing a "Hurricane Hutch" or "Tornado Tank" today. The suggested retail price of both products is \$1,499, which includes all Wej-it® 5/8 inch heavy duty locking bolt kits and home delivery. Both come in 3 standard colors: blue, green and red, with custom colors also available.
