

## **Celergy Appoints Gary Joubert as Manager of National Accounts - The Telecommunications Expert Will Support Company's West Coast Growth**

Carlsbad, CA, March 04, 2008 --(PR.com)-- Celergy Networks, a national leader in the field of [structured cabling](#) for multi-site organizations, today announced that that Gary Joubert has joined the company as Manager of National Accounts / West Coast locations. Mr. Joubert will be working out of Newport Beach and Celergy's Headquarters in Carlsbad.

“Our industry is exploding” said Mark Modricker, Celergy's Vice President of Sales. “The need for cabling is everywhere. It became clear to me that we need to expand our sales team to provide increased coverage for Celergy on the West Coast. Gary brings a long history of business development successes in telecommunications industry. He is an excellent choice for acquiring and growing Celergy's telecommunications national accounts.”

“I am very pleased to join Celergy sales team and help position the company for rapid growth by expanding its market penetration on the West Coast community. Mark has set the stage for success by establishing strong sales processes” said Gary Joubert.

Gary has been in the telecommunications industry for 18 years in several different capacities. Most notable of his former employers was Ericsson, where he spent 9 years with his last position being Director of International Business. Gary also held Vice President positions with BlueTel International and Syniverse Technologies. He started his telecomm career in Southern California as a Financial Analyst in a Communications Engineering firm. Gary has a Bachelors degree in Finance from the University of Southwestern Louisiana.

“The addition of Gary Joubert to Celergy sales team is another important step toward achieving our growth goals. I'm confident in our new sales team's ability to build upon the strong foundation we have established over the course of our existence” said Mark Modricker, Celergy's Vice President of Sales.

About Celergy Networks, Inc.

Celergy Networks, Inc. was founded in 1989 to offer businesses a single-source provider for various telecommunications [national rollouts](#). Installed technologies include wired, wireless, and fiber networks to support voice, data, and security applications. They have experience with devices that attach to the network including voice / data switches, digital signage, point of sales equipment, security systems and more. From the desktop to the DMARC - Celergy Networks has served as a one-stop solution to Fortune 1000 as well as government clients nationwide. Celergy Networks is privately held and headquartered in Carlsbad California.
