

## **TestEquity 1.55 Cu Ft Temperature Chamber Receives CE Mark**

Thousand Oaks, CA, March 19, 2008 --(PR.com)-- The popular TestEquity Model 115 Temperature Chamber provides full-range temperature testing in a compact floor standing or benchtop package. It has a 1.55 Cu Ft interior workspace (16"W x 12"H x 14"D) and temperature range of -73°C to +175°C. The export version, Model 115-EX -- with 230V, 50Hz input -- is now available with the CE mark.

"Obtaining the CE mark for our most popular model of temperature chamber allows our North American customers to provide the duplicate test setups they need in Europe," says Peter Kesselman, VP Product Marketing for TestEquity.

TestEquity Model 115 includes a 256-step programmable temperature controller with RS-232 interface (optional GPIB or Ethernet), an independent high/low temperature limit control with alarm, viewing window and interior light, shelf, and two 3-inch access ports. Availability is stock. Prices for the 115-EX start at \$8,295. Complete specifications and pricing can be viewed at <http://www.testequity.com/products/1145/>.

TestEquity makes the process of purchasing a chamber easy by including the most frequently requested options in a standard unit for one price, with fast delivery from stock.
