

Nevada Company Offers Free Web Seminars on Advantages of Incorporation and LLC Formation

A company providing business owners with services pertaining to asset protection and tax planning recently hosted a seminar in Reno, Nevada, and online versions are now available nation-wide via their website.

Carson City, NV, March 26, 2008 --(PR.com)-- Thousands of businesses incorporate every year, yet only a small percentage of those new companies fully understand how to use their Corporation to take advantage of the asset protection and tax benefits their corporate structure provides. Laughlin Associates, Nevada-based experts on business incorporation and LLC formation, now offer live and web-based seminars which educate business owners about how to leverage the benefits of a properly structured business entity.

A handful of successful business people succeed where millions of others fail for a wide variety of reasons. Intelligence, vision, charisma, a strong team and even luck can all weigh heavily on the life expectancy of a business. There is nothing lucky, however, about selecting the proper business entity for your operations. Fully understanding the benefits of Incorporating in a pro-business state can work towards securing personal and business assets while lowering state income taxes.

“The Secrets of Using a Corporation” seminars, provided by Laughlin Associates and presented by Jim Toma, provide information on how to take advantage of corporate ownership the right way using a [Nevada Corporation](#) or Nevada Limited Liability Company (LLC). Jim is a seasoned entrepreneur and recognized authority on business structuring with an emphasis on asset protection and tax planning.

“Business owners relate to business owners,” says Mr. Toma. “Our seminars are based on real-life situations surrounding business incorporation, asset protection and financial privacy. A Nevada Corporation or [Nevada LLC](#) can be a very useful tool to a business of any size.

Anyone who missed his seminars in Nevada last month are still in luck. Online versions of the presentations are now available at www.laughlinusa.com.

Sixty percent of all closely held corporations will fail to protect their owners in a lawsuit or audit. Whether a business owner is considering Incorporating in Nevada, forming a Nevada LLC or not, Mr. Toma's advice is valuable to corporations in any state. In order for business owners to gain all the benefits they incorporated for, they need to discover simple, proven, profitable strategies that will help their business right away and prevent mishaps that may lead to legal woes.

The recent “The Secrets of Using a Corporation” seminar series began on January 29, 2008 in Santa Rosa, California and will continue throughout February traveling to San Luis Obispo, Santa Cruz and into Washington State for March. For more information on future dates and locations, please call Laughlin Associates at 1-800-648-0966.

Interested parties can also enjoy free web-based versions of Laughlin's seminars by visiting the website. The presentations include information on learning to maximize benefits while minimizing exposure, how to keep your corporation in compliance, how to generate tax free income through the proper use of a business structure and much more. Laughlin Associates has been around since 1972 and has assisted more than 77,000 small corporate owners in reaching their financial goals.
