

## **ComputerTraining.com Launches New Microsoft Networking Technologies Program**

*In January 2008 ComputerTraining.com of Cleveland began the first class to train in their new "Microsoft Networking Technologies Program." This enhanced program for the first time includes training on Microsoft Windows Vista.*

Cleveland, OH, March 26, 2008 --(PR.com)-- [Computertraining.com's](http://Computertraining.com) program continues to include a detailed analysis of the Microsoft Windows Server 2003 operating system. Network security also continues to be the focal point of the program including training on encryption, the Microsoft ISA firewall product, network monitoring and best security practices for network administrators. [Computertraining.com's](http://Computertraining.com) redesigned program now offers an even greater amount of "hands-on" training for the students enrolled in it. It includes a wide variety of labs which beginning with the basic tasks and progress in complexity to simulate the situations and challenges that these future network administrators will face on a daily basis.
