

## **DVDVideoSoft Updates Free Video to Flash Converter**

New York, NY, May 06, 2008 --(PR.com)-- DVDVideoSoft an internet resource dedicated to free software, multimedia software guides and tutorials has just updated [Free Video to Flash Converter](#). This is the major update that features lots of improvements: the batch mode to convert several files at once and the preset editor to edit pre-configured output profiles and create the new ones; 40+ player skins (two new basic skins were added and each of them has six different colors themes). Also the flash player source codes were disclosed. So users experienced in Macromedia Flash can download the sources from the Free Video to Flash Converter page:

<http://www.dvdvideosoft.com/products/dvd/Free-Video-to-Flash-Converter.htm>, modify them and use by themselves or share it with others.

Now with Free Video to Flash Converter it is very easy to enrich a corporate web site or a personal blog with a good looking video. Convert video files to flash (SWF and FLV). Convert the whole movie or just a partition. Convert several files at once. Apply 40+ player skins. Free Video to Flash Converter available at <http://www.dvdvideosoft.com/free-dvd-video-software.htm> for immediate free download. The program contains no spyware or adware. It's clearly free. No activation or registration is required. Just download and use it.

The program is free for both home users and businesses.

Free Video to Flash Converter is already the 15th free program developed by DVDVideoSoft. DVDVideoSoft has created a line of free tools: Free Video Dub; Free YouTube to iPod Converter; Free YouTube to MP3 Converter; Free YouTube to iPhone Converter; Free Video to iPod Converter; Free Video to iPhone Converter; Free Video to MP3 Converter; Free YouTube Uploader; Free Audio Dub; Free YouTube to MP3 Converter; Free 3GP Video Converter; Free Video Flip and Rotate; Free Video to JPG Converter and finally Free YouTube Download.

These titles are available for immediate download. All of the company's programs are absolutely free and run under all Windows operating systems, including Vista. DVDVideoSoft respects user privacy, and the company does not utilize any spyware or adware, so it is safe to install and run.

In addition to all freeware, DVDVideoSoft offers Free Software DVD Player on the site: <http://www.dvdvideosoft.com/products/dvd/Free-DVD-Player-Software.htm>.
