

"Corporate Network Security" – Are We Really Safe?

Washington, DC, April 07, 2008 --(PR.com)-- How Corporations Can Achieve Optimal Protection - Are We Defenseless Against Cyber Criminal Activity?

With the IT Security epidemic we are facing now, are our networks we really safe? This conference will focus on what is needed to accomplish a secure network anyone would be proud of. To assist with this, they are hosting a Corporate Network Security Leadership Event in Washington, D.C. on October 16-17, 2008.

This two-day Strategic & Educational leadership event focusing on:

- Responding to the challenge of protecting sensitive data - Leading causes of data loss - The benefits of protecting sensitive data - Security threats to Web 2.0 - IT Security awareness among the public - Best practices in securing networks - Protecting your company from the malware epidemic - Emerging security technology

Who Will Attend:

This conference is created for Chief Security Officers, Chief Technology Officers, Chief Information Security Officers, Directors and Managers representing Retail, Financial Institutes, Manufacturing Companies and Universities.
